Customer Service

## Summary

I'm a second year ICT student at Oulu University of Applied Sciences. I'm a motivated and fast learner. I love coding and technology. Pretty much every field in ICT interests me. I have experience in using a variety of different programming languages. In the future I would like to learn full stack development and cloud computing. I don't have any working experience from ICT yet, but I make up for it with my strong will to learn.

## Work Experience

### Salesperson, HOK-Elanto Liiketoiminta OYJ

March 2022 - July 2022

I worked both at the cash register and in the store. This taught me a lot about customer service and work life in general.

## Education

### Bachelor of Engineering, Information Technology, Oulu University of Applied Sciences

2022 - Present

### Summer game studies

May 2023 - August 2023

I took a summer course where we learned the basics of Unreal Engine 5. After learning the basics, we needed to make a playable game. We decided to make a 3D bullet hell game. My main tasks included designing and programming different projectiles and designing and making the environment for a boss fight. Later on I also took on a responsibility of designing our enemy ai.
